PROFESSIONAL SUMMARY

Full Stack Developer with 2.8+ years of experience architecting and delivering secure, high-performance web applications using Laravel/PHP. Specialized in REST API development and third-party API and payment gateway integrations (Razorpay), with proven cross-stack versatility across React.js and Angular. Contributed to 4+ production applications spanning ERP, finance, and inventory domains, collaborating within teams of 5-6 engineers. Self-driven learner continuously upskilling in emerging full-stack technologies.

TECHNICAL SKILLS

Backend: PHP, Laravel, Python, Django, Django REST Framework, REST API, MVC Architecture, ORM

Frontend: HTML5, CSS3, Bootstrap, JavaScript, jQuery, React.js, Angular, Next.js

Databases: MySQL, MS SQL Server, PostgreSQL

Integrations: REST API Development, JWT Authentication, Third-Party API Integration (Magento)

Payments: Razorpay Payment Gateway Integration

Tools: Git, WinSCP, Jira, Postman, Azure DevOps (Repos & Pipelines)

WORK EXPERIENCE

Full Stack Developer — Step In Technologies, Shivamogga, Karnataka

Oct 2023 – Present (2.8+ Years)

- Collaborated within a cross-functional team of 5-6 developers to deliver 4+ full-stack production applications across education, and finance domains using Laravel and PHP.
- Designed and built RESTful APIs and integrated the Razorpay payment gateway, enabling secure transaction processing across multiple client applications.
- Architected and optimized MySQL database schemas, improving query performance and data integrity for enterprise-scale applications.
- Developed responsive, component-based frontends using React.js, Angular, HTML5, CSS3, Bootstrap, and JavaScript, ensuring consistent UI/UX.
- Integrated the Magento API for inventory, streamlining product data synchronization for a seed-inventory platform.
- Managed application deployment, server updates, and ongoing maintenance using WinSCP, supporting stable operation.
- Used Azure DevOps to merge code across sandbox, UAT, and production branches and to trigger existing CI/CD pipelines as part of the release process.

KEY PROJECTS

1. Education ERP Solutions

- Built a comprehensive College ERP covering academics, finance, and examinations, automating student attendance, section allocation, and staff leave management.
- Implemented an automated result generation and grading engine, reducing manual processing effort for academic staff.

Tech: HTML, CSS, JavaScript, PHP, Laravel, MySQL, Bootstrap

2. Finance Management System

- Developed a loan management platform handling interest calculation and financial record-keeping for lending operations.
- Integrated an React frontend with Laravel REST APIs for seamless, real-time data processing.

Tech: React.js, PHP, Laravel, MySQL

3. Inventory Management System

- Developed a seed-inventory platform with Product, Order Form, and Lot-tracking modules for end-to-end inventory control.
- Integrated the Magento open-source API for product synchronization across sales channels.

Tech: HTML, CSS, JavaScript, PHP, Laravel, MSSQL

4. Warehouse Management System (WMS) — Personal Project

- Designed and built a full-stack WMS using Angular and Django REST Framework to streamline warehouse operations.
- Implemented JWT-authenticated REST APIs across Warehouse, Product, Category, Supplier, Customer, and User Management modules.

Tech: Angular, TypeScript, Django, Django REST Framework, PostgreSQL, HTML5, CSS3, Bootstrap 5, AG Grid, Git

EDUCATION

Bachelor of Computer Applications (BCA)

Kuvempu University, Shankaraghatta | 2021 | 73.5%

SOFT SKILLS & STRENGTHS

- Cross-functional Project Delivery
- Independent Learning & Upskilling
- Problem-Solving & Debugging
- Client Requirement Analysis
- Agile / Jira Workflow Management
